

How to guide

Overview of the DreamBox Maths Educator Dashboard: The Home page

he Home page

The Home page brings together weekly data about your class(es) into a single view that you can easily scroll through to plan your day-to-day.

From your Home page, you can:

- Review weekly student usage stats.
- Receive notifications about milestones or students who may need assistance.
- Discover what students are working on in DreamBox Maths.
- Create Assignments.
- Access sign-in credentials.

Navigating the Home page

To open the Home page, click the **Home** icon.

Use the filters at the top of the page to view student usage data from the current or previous week - or to select a specific classroom or student.

The Alerts and Achievements section

This section highlights which standards and lesson groups your students have completed for the selected week as well as which students may need your attention. You can also open the Activity Feed Report which provides actionable information on what lessons students are playing and if students are completing them with understanding.

The Currently Playing section

This section provides you with insight into what Lesson Groups your students are currently working on as well as what Year Level and Domain. The Currently Playing section will update throughout the week. Select **view standards report** in the top right corner to take a deeper look at which standards your students are working on.

What are Lesson Groups in DreamBox Maths?

Maths lessons come in groups, with each successive lesson building on the skills and concepts the student was working on in the previous lesson. While they may look and feel the same, each progressive lesson will offer more challenging questions or offer less assistance to find the solution. Multiple lessons make up a Lesson Group, and multiple Lesson Groups make up a Standard or Domain in DreamBox Math.

The Assignments section

The Assignments feature helps teachers focus on specific standards and concepts. The Assignments section on the Home page helps teachers easily create a new assignment or view student progress on current assignments.

Review usage and progress for a single student

To review the progress of one student in your classroom, click their name in the Student Usage chart. Student Usage, Alerts & Achievements, Currently Playing and Roster sections will open.
