# DreamBox Maths: The Activity Feed Report

Help guide

In addition to usage and progress data, the DreamBox Maths Insight Dashboard allows educators to track every lesson their students played in the last 30 days.
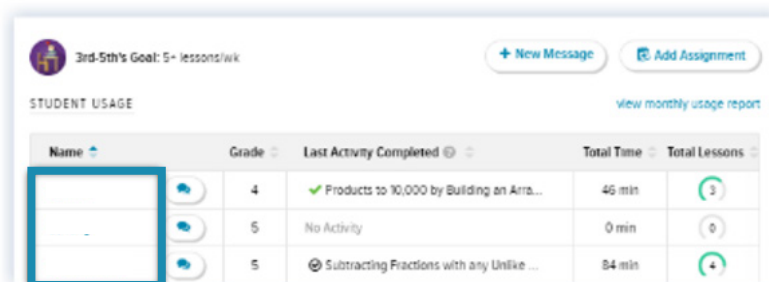

The Activity Feed report:

- Provides actionable information on what lessons and lesson groups students are playing.
- Records if students are completing lessons with understanding.
- Allows you to play similar lessons as a teacher.

To open the report:

- Select **Home** in the top navigation pane.
- In the filters at the top of the page, select a classroom.
- **To see the activity for the entire classroom**, scroll down to the Alerts and Achievements section and click **view activity feed report.**

- **To see the activity of one student**, in the Student Usage table, click the student's name. Then scroll down to the Alerts and Achievements section and click **view activity feed report.**

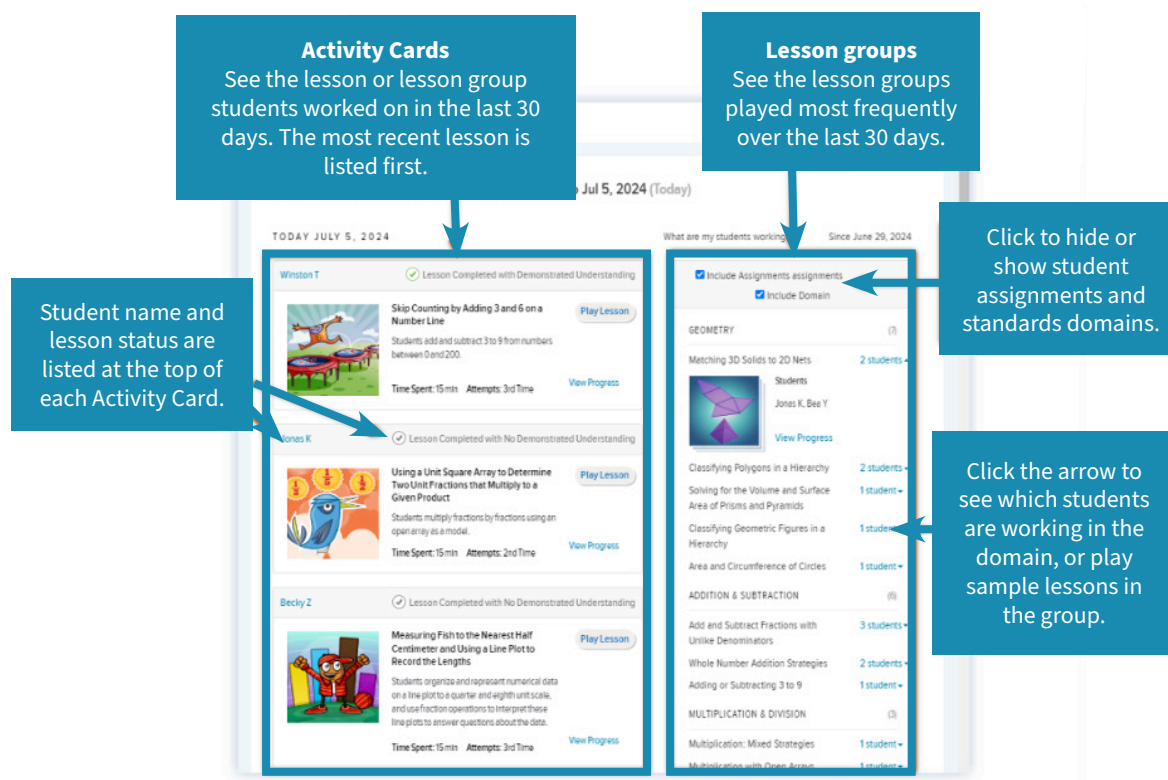

Educators must be attached to the student's classroom to access and view the student via the Home Page.

- To close the report, click **Close Report** in the top right corner of the screen.

The Activity Feed layout

The data in the classroom and single-student Activity Feed reports is divided into two columns.
The image below shows the Activity Feed report for an entire classroom.

Activity Cards
See the lesson or lesson group students worked on in the last 30 days. The most recent lesson is listed first.

Lesson groups
See the lesson groups played most frequently over the last 30 days.

Click to hide or show student assignments and standards domains.

Student name and lesson status are listed at the top of each Activity Card.

Click the arrow to see which students are working in the domain, or play sample lessons in the group.

Reading Activity Cards and playing sample lessons

There are two types of Activity Cards. The images below are from a single student's Activity Card.

The numbers in lesson problems may be different than what the student saw.

Lesson Cards

Icon shows student understanding when they stopped playing the lesson.

Click to play a demo version of the lesson.
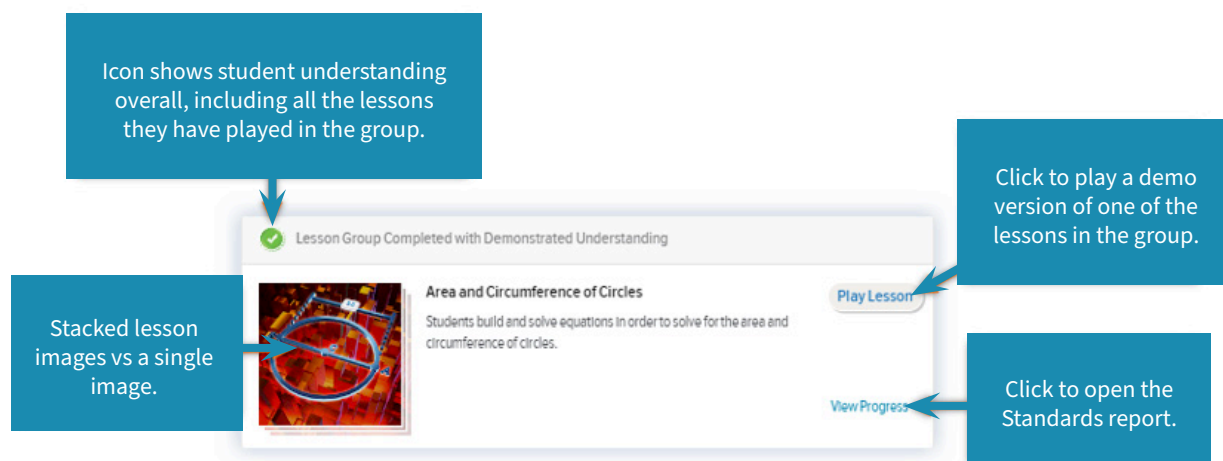

One lesson image vs a stack of images.

How long the student played the lesson.

How many times the student played the same lesson.

Click to open the Standards report.

Lesson Group Cards

Icon shows student understanding overall, including all the lessons they have played in the group.

Click to play a demo version of one of the lessons in the group.

Stacked lesson images vs a single image.

Click to open the Standards report.

Lesson Group Completed with Demonstrated Understanding

Area and Circumference of Circles
Students build and solve equations in order to solve for the area and circumference of circles.

Play Lesson

View Progress

To complete a Lesson Group with demonstrated understanding, a student must demonstrate proficiency in all content contained in the Lesson Group. Depending on how well they complete lessons, one student may not need to play every lesson in a group to demonstrate proficiency while another student may need to play each lesson multiple times.

What do the Activity Card icons mean?

Icon	Meaning
✅	The student completed a **single lesson** with demonstrating understanding.
	Check the lesson attemps at the bottom of the card to see if this is the first time the student played this lesson or if they needed to play it multiple times.
✅	The student completed a **Lesson Group** with demonstrated understanding. To demonstrate understanding in a Lesson Group, students must demonstrate proficiency on all the lessons they play that are part of the group.
	Depending on how well they complete lessons, one student may not need to play every lesson in a group to demonstrate proficiency while another student may need to play each lesson multiple times.

What do the Activity Card icons mean?

Icon	Meaning
(check icon)	The student completed a lesson without demonstrating understanding. If a student does not demonstrate understanding, the programme will adapt by either presenting the student with the same lesson so they can try it again, or present a different lesson that may better meet their learning needs. Check the lesson attempts at the bottom of the card to see if this is the first time the student played this lesson or if they have played it more **than once without demonstrating understanding.**
(pause icon)	The student stopped playing the lesson before they finished it. The student will still be able to see and select this lesson from their lesson chooser until they complete it.
(calendar icons)	The lesson is part of a long or short-term assignment. • **Blue star calendar** = Short term assignment. • **Multiple day calendar** = Long-term assignment.

FAQs

Who can see the Activity Feed report?
Administrators and teachers can view student activity for an entire classroom or specific student.

When does the report update?
The Activity Feed report updates in almost real-time.
