

An Overview of your Teacher Dashboard

Resources

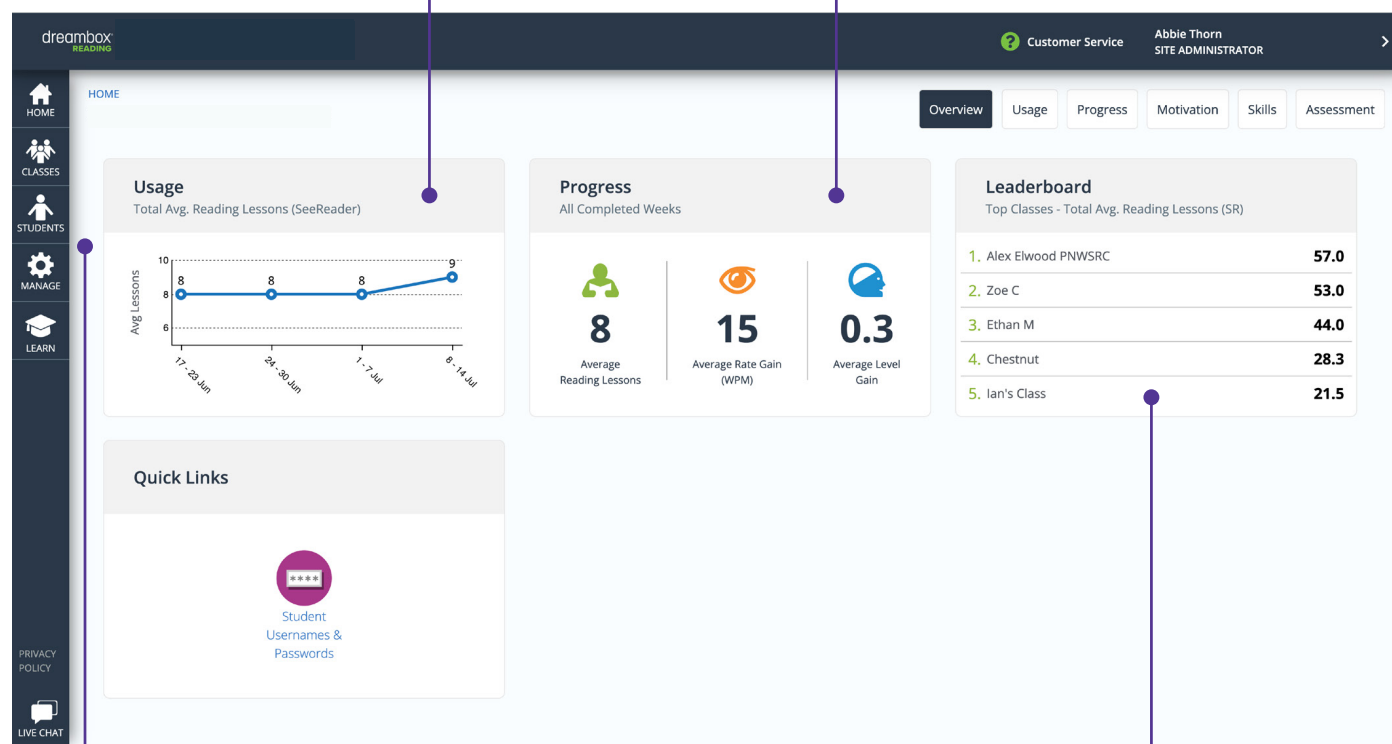

We would strongly recommend that you log in to your Teacher Dashboard whenever students are working on DreamBox Reading Plus as this will alert you to any students needing your immediate attention and allow you to monitor if weekly usage targets are being met.

When you first log in to Reading Plus, you are taken to the school's Home page. Your Home page gives you an overview of all usage and progress across the school. You can then access data for individual classes and students to monitor usage, progress and demonstrate impact.

Navigating your Home page

For the Reading Plus Lead Teacher or a school leader, clicking on the **Use** tile brings up a report that lets you see an overview of usage across all classes on Reading Plus.

The **Progress** tile gives a Class by Class view of the average number of Reading lessons completed, plus their gains in terms of average words per minute and comprehension level increases.

Choose the **Home** button to return to the Home page directly at any time.

Choose the **Classes** button to access usage, progress & impact data on individual Classes and Groups.

Choose the **Manage** button to change settings and perform admin tasks (e.g. adding/removing pupils).

Choose the **Students** button to access usage, progress & impact data on individual pupils.

Click the **Leaderboard** tile for a downloadable report highlighting Class achievements (e.g. total words read, average comprehension score, numbers of Combos achieved this week).

You can print and display the Leaderboard report at the front of the classroom, or email to class teachers to share with pupils through an interactive whiteboard.
