Class Leaderboard Report
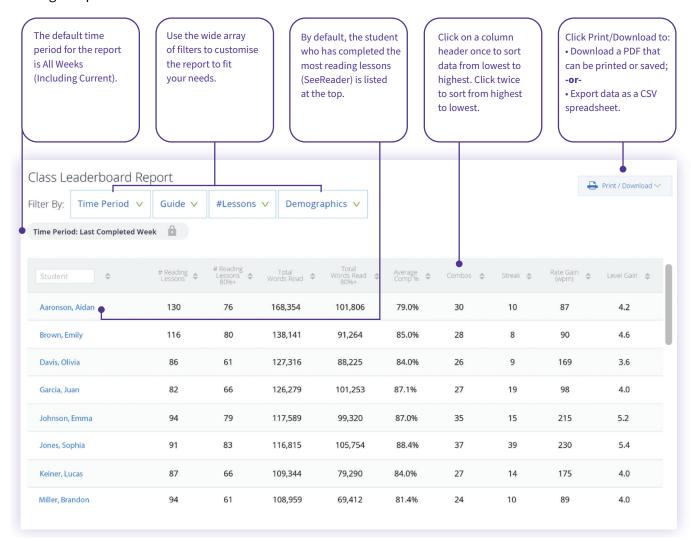

The Class Leaderboard Report shows each student's Reading statistics for the identified time period. Teachers can use this information to develop motivation strategies for a whole class, or for individual students. Strategies may involve having all students working together toward a class-wide goal, or recognising class leaders based on a specific statistic. Having a motivation plan in place keeps students focused on achieving success in the reading component.

The default time period for the report is All Weeks (Including Current).

Use the wide array of filters to customise the report to fit your needs.

By default, the student who has completed the most reading lessons (SeeReader) is listed at the top.
