

How To Adjust Instructional Programme Settings for an Individual Student

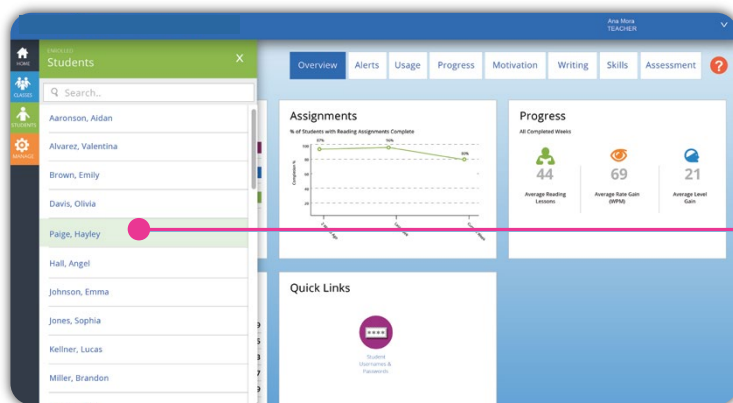

Resources

Reading Plus places students appropriately in each instructional component based on their needs. Teachers can make adjustments to an individual student's settings in the Reading and Vocabulary components.

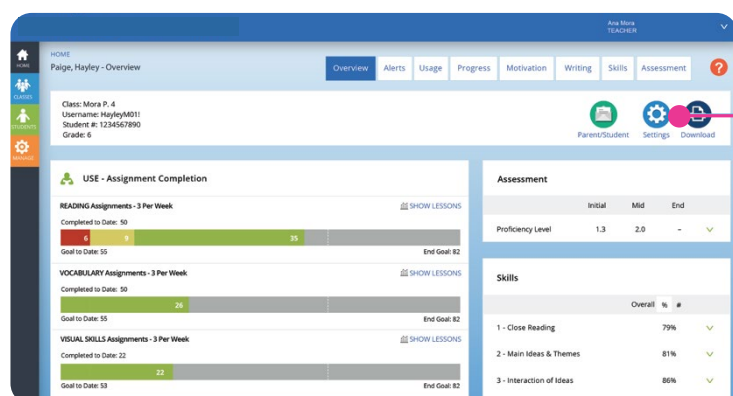

To adjust programme settings for an individual student:

Click *Students*.

Click the students whose assignments you want to adjust.

Click *Settings*.

Cancel Save

- For the Reading component, you may choose to adjust Level, the rate of the Guided Window (G-Rate), or the number of ReReads available for every lesson.

- For the Vocabulary component, you can choose to modify Level or the audio languages available.

- Click Save.

Tip:

“Hi” content levels contain “high interest, low readability” selections and are available to students in Year 7 or higher who are working on Reading levels A through E. This provides older struggling readers with content that is conceptually more interesting while they build efficiency with content at lower readability levels.
